Hazardous Weather

Hazardous Weather

Chances of Rain Tuesday Night

Weather Forecast Office
Amarillo, TX
Issued Aug 17, 2020 4:10 AM CDT

Thunderstorms will be possible across the central and eastern Oklahoma Panhandle and the northeast Texas Panhandle. A storm may become severe with large hail and damaging winds.

Elevated Fire Weather

From Late This Morning Through This Afternoon.

Weather Forecast Office
Midland/Odessa, TX
Issued August 17, 2020 2:19 AM CT

Lack of recent rainfall and hot conditions will result in elevated fire weather conditions from late this morning through this afternoon from the Stockton Plateau southwest to the Big Bend, Marfa Plateau, Chinati Mountains and Presidio Valley.

Hazardous Weather

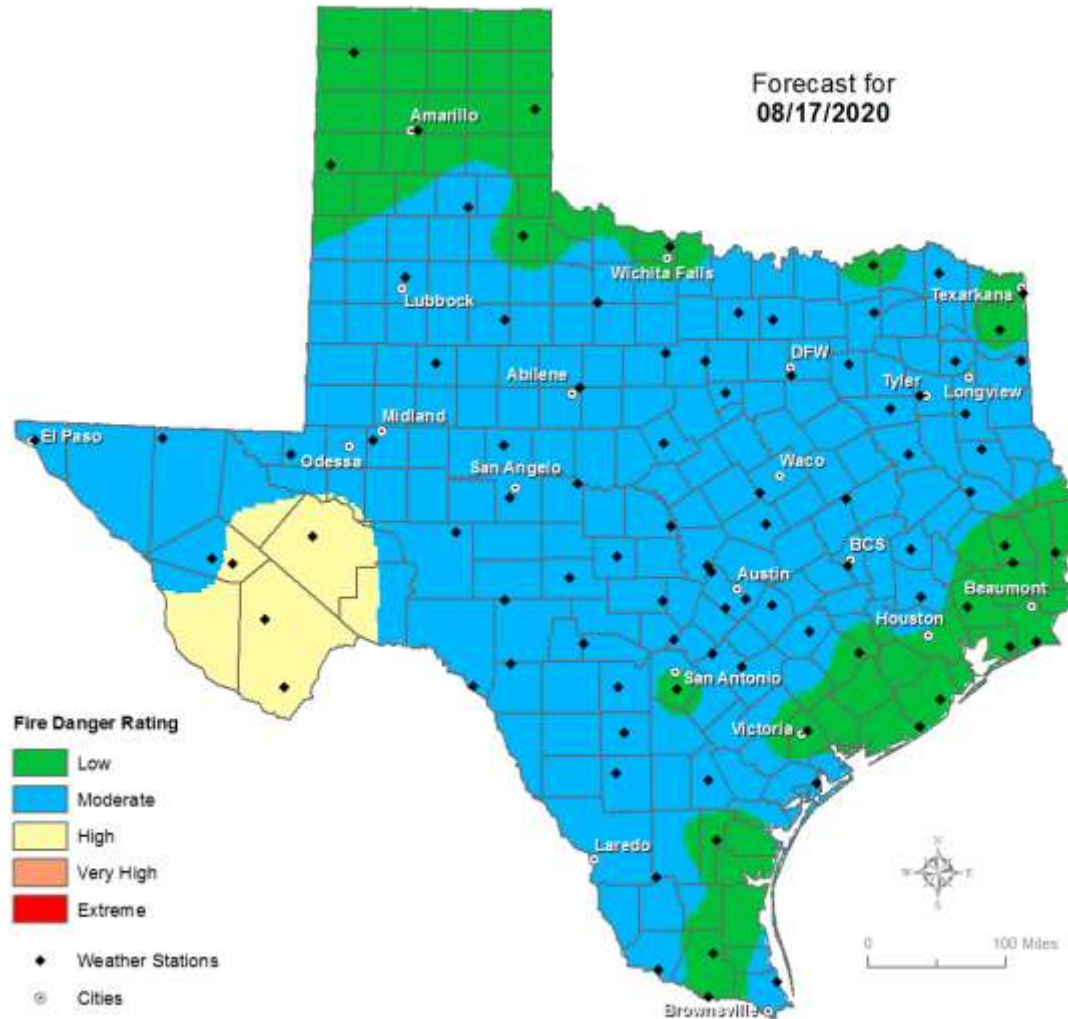

A few early morning showers will remain possible over primarily the east half of the area. Additional development of showers and thunderstorms is expected this afternoon, gradually sinking southward this evening. There is a marginal risk for an isolated strong to severe storm to develop late, primarily along and south of a line from Rocksprings to New Braunfels to Cuero, with the potential for gusty winds to 60 mph. If precipitation remains more isolated or develops later in the day, high temperatures may rise a few degrees above what's depicted here.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
